

## REMARKS

By this amendment, Applicant has canceled claims 1-11 and added new claims 12-31. As a result, claims 12-31 are pending in this application. These amendments are being made to facilitate early allowance of the presently claimed subject matter. Applicant does not acquiesce in the correctness of the objections and rejections and reserves the right to pursue the full scope of the subject matter of the original claims in a subsequent patent application that claims priority to the instant application. Reconsideration in view of the following remarks is respectfully requested.

In the Office Action, claims 1-11 are rejected under 35 U.S.C. § 102(e) as allegedly being anticipated by U.S. Patent No. 6,615,234 (Adamske). By this amendment, Applicant has canceled claims 1-11 and added new claims 12-31. As a result, Applicant respectfully submits that the previous rejections by the Office are moot and requests withdrawal of these rejections.

Applicant respectfully submits that the newly presented claims are patentable as presented over Adamske and the rest of the cited art. For example, regarding claim 12, neither Adamske nor the cited art discloses, *inter alia*, generating a preview of a configured copy of a document on a server based on a print file and configuration information for the document. Regarding claim 17, neither Adamske nor the cited art discloses, *inter alia*, including a customized memo based on customized memo information for each of a plurality of delivery addresses along with a copy of a document. The remaining claims contain one or more features similar to the unique features stated above as well as their own unique features.

In light of the above, Applicant respectfully submits that all claims are in condition for allowance. Should the Examiner require anything further to place the application in better

condition for allowance, the Examiner is invited to contact Applicant's undersigned representative at the number listed below.

Respectfully submitted,
